

THE GOLD BUG VARIATIONS

A feature film from the award-winning director **Mark A. Levinson**
based on the acclaimed novel by **Richard Powers**.

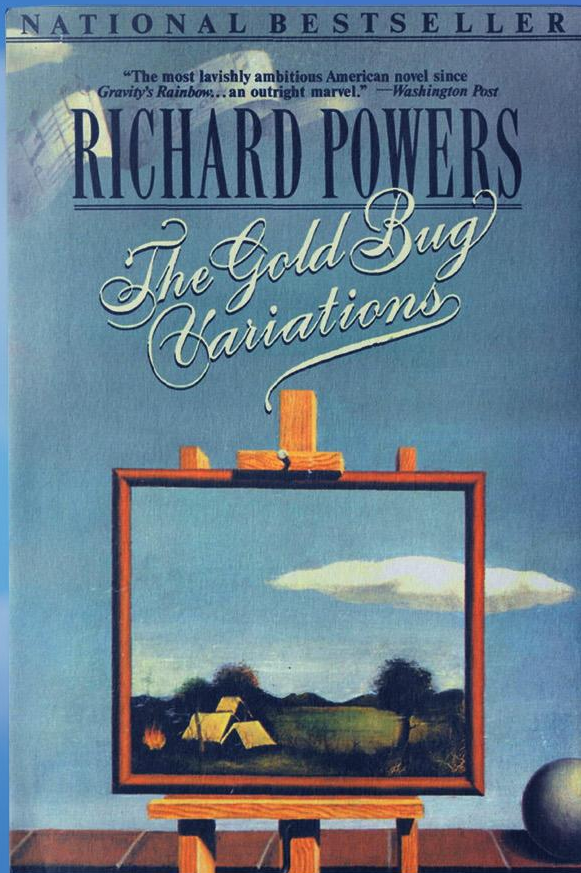

Based on the prize-winning novel

"Book of the Year"

—Time Magazine

**"This amazing book deals with
nearly all of life's larger
questions."**

—Magill Book Reviews

**"The Gold Bug Variations
has everything"**

—NY Times Book Review

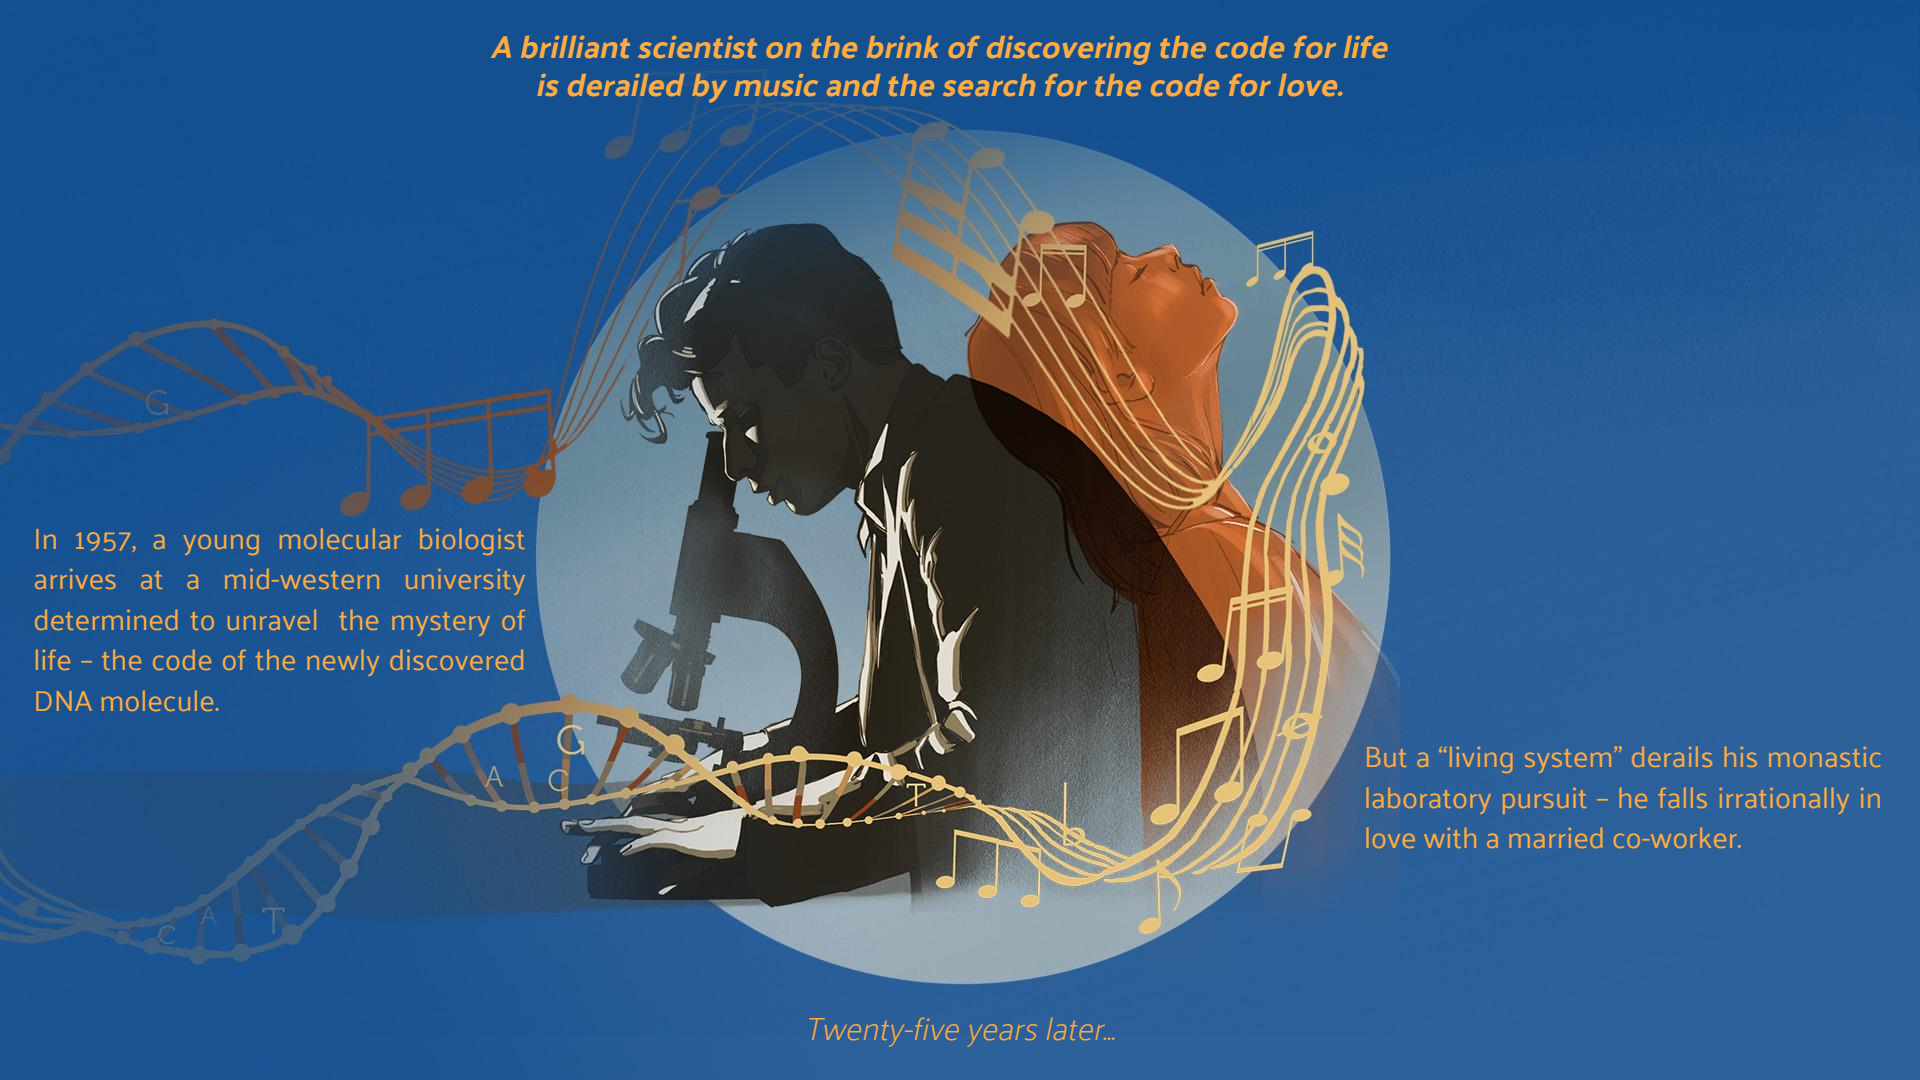

**"A formidable masterpiece...
rewarding in every sense but, in
particular, a profoundly moving
love story."**

—Kirkus

From the Pulitzer Prize-winning author of *The Overstory*.

*A brilliant scientist on the brink of discovering the code for life
is derailed by music and the search for the code for love.*

In 1957, a young molecular biologist
arrives at a mid-western university
determined to unravel the mystery of
life – the code of the newly discovered
DNA molecule.

But a “living system” derails his monastic
laboratory pursuit – he falls irrationally in
love with a married co-worker.

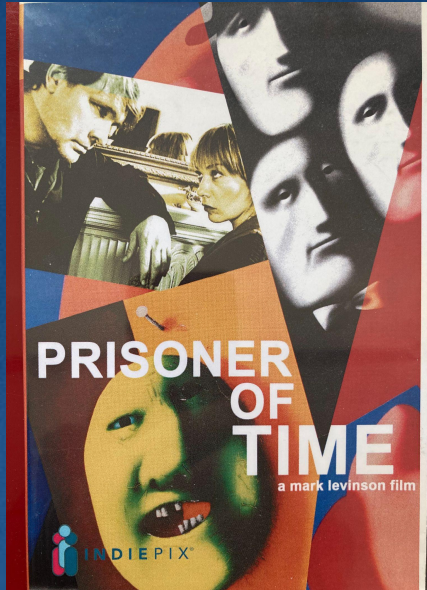

Twenty-five years later...

In 1982, another young couple team up to investigate a related mystery – who is the refined, over-educated gentleman who works as a graveyard shift computer operator in a dull Brooklyn data processing company?

The stories of the four main characters, like the four nucleotides of DNA, and the four bass notes of Bach's Goldberg Variations, twist around each other in mirrored patterns as they try to decode the complex rules of biology, of music, and of love.
